**To:** Holly Kovarik, Sauk River Watershed District - District Administrator  
Mike Haymen, Sauk River Watershed District - Ditch/Permit Coordinator

**From:** Jeremy Schultz, P.E. Wenck Associates, Inc.

**Date:** January 12, 2010

**Subject:** CD 9 Repair Report Addendum

---

While preparing the repair report of Stearns County Ditch 9 (CD 9) the engineer was made aware that property that is not assessed for benefits of the repair is benefiting from the CD 9 drainage system. Wenck Associates has prepared a map showing all properties hydraulically benefitting from the CD 9 drainage system. This map is attached to the CD 9 Repair Report Addendum (Figure 1).

The CD 9 drainage system watershed boundary was determined using 2 foot contour data provided by Stearns County and preliminary filed review. All properties within this watershed boundary receive a hydraulic benefit from CD 9. Properties with land both inside and outside the hydrologic boundary were determined to be benefiting hydraulically if more than 50% of the property was within the hydrologic boundary.

All properties determined to be receiving hydraulic benefit from CD 9 are highlighted and labeled with a number in Figure 1. The property owner can be found in Table 1 with the corresponding property number.
